

Electrical Options

Add heat and lights to make your storage space more comfortable.

Lighting

It's always easier to find things if you can see what you're doing. When you buy a container, you're obviously planning on using it over the long term. Making the work space more efficient just makes sense.

Heating

Let's face it, Canadian winters can be a little chilly. When you add insulation and heating to your container, you'll get a break from the great Canadian outdoors. It'll make your work more comfortable and more efficient.

Responsive Service

Throughout our network of locations we can add a variety of modifications. Our stores are backed by a Canadian support team, so you'll always have your needs addressed quickly. And if there's ever a problem, we'll fix it.

Moving and storage that feels better.

Some jurisdictions in Canada require an independent electrical certification (SPE-1000 or equivalent) on prefabricated buildings containing an electrical panel. If this certification is required for your package, please let us know! Specifications subject to change. Product delivered may vary from images.
